## Projects

---

**SpeakEasyAI | Vadodara, Gujarat**  
**Python Developer | 11/2023 - 11/2023**

The application will enable users to interact with an AI powered ChatBot, mimicking human-like conversations and response.

Technology used :- Flutter framework, ChatGPT API, Backend Integration.

Github :- [ChatGPTClone](#)

## Skills

---

Flutter Development, Python, C++, MERN , FULL STACK, Git and Github

## Education

---

**Parul University | Vadodara, Gujarat**  
**Bachelors of Technology in Information Technology | 04/2025**

Throughout my college years, I maintained a strong academic performance while actively contributing to campus life. I took leadership roles in student organizations, orchestrating successful events and initiatives. Engaging in meaningful research projects, I collaborated on published work, delving deeper into my field. Outside academia, I dedicated time to community service, volunteering for impactful projects. Practical internships rounded out my experience, providing valuable hands-on learning. These diverse experiences shaped my college journey, instilling a commitment to both personal growth and community engagement.
